

Meeting Agendas/Info

**CITY COUNCIL
COMMUNICATION:**

01-619

AGENDA:

DECEMBER 17, 2001

SUBJECT:

PROGRESS REPORT
FOR THE FOURTH
QUARTER OF FISCAL
YEAR 2000-2001
RELATED TO THE
CHANGE
MANAGEMENT
PROGRAM AT THE
DES MOINES
METROPOLITAN
WASTEWATER
RECLAMATION
FACILITY

TYPE:

RESOLUTION
ORDINANCE
RECEIVE/FILE

SUBMITTED BY:

WILLIAM STOWE
PUBLIC WORKS
DIRECTOR

ITEM _____

**OFFICE OF THE CITY MANAGER
CITY OF DES MOINES, IOWA**

SYNOPSIS -

The City of Des Moines, as operating agency of the Metropolitan Wastewater Reclamation Authority (WRA), engaged EMA Services as a change management consultant in 1997. In 2000, the City assumed full responsibility for this process and ended its Organizational Developmental Change Management (ODCM) relationship with EMA. This change management process involved organizational improvements, a focus on team achievements, greater use of automation, and improved work practices. The City Council requested quarterly progress reports on the Competitive Strategic Plan developed in the program at the March 15, 1999 meeting.

FISCAL IMPACT -

Consulting costs of \$619,940 have been easily offset by cumulative savings exceeding \$5 million through the end of this fiscal year. No consulting services are currently being used for ODCM.

Cost reductions of \$315,709 (for 1997/1998), \$953,993 (for 1998/1999), and \$943,431 (for 1999/2000) were reported previously - **today we report \$3,102,808.**

RECOMMENDATION -

Receive and file.

BACKGROUND -

The original agreement between the City and EMA, Roll Call No. 97-2709, passed on August 4, 1997, was to conduct an assessment of the WRA relative to private contract operations for an estimated \$25,000 fee and evaluate the Process Control System (PCS) for \$71,500.

Amendment Number One, for \$272,370, was to design the PCS replacement system. Amendment Number Two, for \$172,080, was to conduct the first part of Phase II (A) Change Management Program. This work included the design of the Preliminary Change Program through development of the Steering Team and the first Design Teams. These amendments were passed on June 15, 1998, by Roll Call No. 98-1930, and are complete.

Amendment Number Three included team training on process improvement. Costs of \$422,860 were authorized on March 15, 1999, by Roll Call No. 99-765. This final phase of ODCM initiated re-engineering business practices developed by the design teams. These new practices resulted in:

- Less attended operations made possible through the new PCS.
- Increased proactive, predictive maintenance with 75 percent of all work planned and performed prior to failures.
- Changes in employees' skills, training, and incentives.
- Improved processes for purchasing goods and services.

The teaming approach and change in cultural attitudes has resulted in cost reductions. As reported to Council on several occasions, the employees at the Des Moines Metropolitan Wastewater Reclamation Facility (WRF) have been focused on a process aimed at reducing long-term operating and maintenance costs paid by the constituent communities of the WRA. In 1998, the goal of reducing \$2,000,000 in operating and maintenance expenses, adjusted for Consumer Prices and other specified expenses, by the end of Fiscal Year (FY) 2002/2003 was announced. Some viewed this goal as too aggressive and not attainable without significant adverse consequences on the Facility's Operating Mission of protecting the Des Moines River through treatment of area wastewater. As noted in the attached financials, not only was the \$2.0 million goal reached, it was exceeded one year early, and without adverse impact on our Mission and responsibilities as the leader of environmental stewardship of Central Iowa waters.

This extraordinary achievement could not be met without the efforts of each and every one of the 100 employees at WRF and their Union Representatives. In addition, the Facility's employees went a record setting one full year without a lost time injury. They accomplished this achievement at a time of extraordinary organizational change including significant staff reductions. By

promoting a safer work environment, the WRF not only saves the economic costs of workers' compensation, but also protects against the tragedy of workplace injuries and the trauma healing. Finally, the Facility remains committed to on-going organizational improvements and capital investments positioned toward providing better service to our constituent communities through continuous improvements and investments in our employees.
