On February 13, 2013 the Regulation and Ordinance (R&O) subcommittee of the Plan and Zoning Commission recommended that the following definition be prepared for public hearing by Plan and Zoning Commission:

Small engine means a motor used to power home tools and equipment including generators, lawnmowers and other outdoor power tools producing an average output that ranges around 25 horsepower, which is usually powered by gasoline and that varies in size, shape and compression process depending on its configuration.

The proposed definition would be added to Section 134-3 of the City Code. In addition, the list of permitted uses for the C-1, Neighborhood Retail Commercial District (Section 134-842) would be amended to specifically reference small engine repair shops.

II. ADDITIONAL APPLICABLE INFORMATION

Staff contacted DMACC for input regarding the proposed definition of a small engine. DMACC representatives indicated they do not have a "small engine" certification program and did not offer any changes to the proposed definition.
